Tell me about yourself:

- ➢ How long you've been working in the field
- ➢ What you've done as a QA Professional
  - o SDLC Phases
  - o Methodologies you've worked in
    - ▪ Waterfall
    - ▪ Agile - Scrum
  - o Meetings
  - o Documents Created
  - o Requirements Analysis
  - o Types of Testing
  - o Tools you've used
  - o What you did with each tool specifically
    - ▪ What you did with ALM
      - • Creating Requirements
      - • Traceability Matrices
      - • ALM Export Wizard
      - • Test Case Design in Test Plan Module
        - o ALM vs. Excel
        - o Design Step Creation
        - o Templates
        - o Parameters
      - • Requirement and Test Coverage
      - • Test Execution in Test Lab Section
        - o Creating Test Sets
        - o Test Run Schedules
        - o Analyzing Test Results
      - • Defect Logging/Tracking in the Defects Module
        - o Logging defects during test execution
        - o Creating stand alone defects
    - ▪ What you did with UFT
      - • Script enhancements
        - o Checkpoints
        - o Recovery Scenarios
        - o Data Parameterization
      - • Working with Object Repositories
      - • Descriptive Programming
      - • Data Parameterization
        - o Excel – Read & Write
        - o Databases
        - o Notepad
      - • Capturing dynamic Output values
        - o GetROProperty
      - • Error Handling
        - o On Error Resume Next
        - o Err Objects
        - o Recovery Scenarios
      - • Environment Variables & XML
      - • Custom Functions and Function Libraries
      - • Automation Object Model
      - • VBScript
      - • Frameworks
